Harrison R. Brown

Software Engineer

206 SCHOLES STREET · APT 20 · BROOKLYN, NY 11206
(770) 851-6815 · harrisonrbrown90@gmail.com · harrisonrbrown.com

Skills

Languages: Ruby · JavaScript · Python · **Technologies**: Rails · RSpec · React/Redux · D3.js · Jest · TypeScript · PostgreSQL · MS SQL Server · **Practices**: TDD · Pair programming · **Other**: Graph theory · Algorithms

Experience

AUGUST 2014 - DECEMBER 2016

Tec-Trac, Inc. – *Programmer*

Maintained GPS tracking app for parents of teen drivers · Built admin tools to facilitate customer support interactions · Automated retrieval of missing data from trackers · Created data structures to handle data received out-of-order · Wrote low-level scripts and backend parsing algorithms for a new tracking hardware solution

Projects

Slabb – [link]() – [github]()

Built a feature-rich chat app inspired by Slack using Ruby on Rails and React/Redux for easy code maintainability · Used the Pusher websockets API for live chat functionality

Data Don't Lie – [link]() – [github]()

NBA statistics visualization · Implemented interactive charts via D3.js using a Redux-inspired model/update/view architecture · Implemented storage and retrieval of view data in Firebase so that users can share charts

ZeroOne – [github]()

Wrote an efficient implementation of branch-and-bound search and extensive test coverage for ultra-lightweight JavaScript library for 0-1 integer programming

Education

University of Alabama, Tuscaloosa – *B.S., Mathematics* – 2012

Took advanced coursework in topics including: linear and abstract algebra, graph theory and combinatorics, and theoretical CS · Placed in top 40 on prestigious national mathematics exam

App Academy, New York – 2017

Completed an intensive (1000+ hours) and selective (< 3% acceptance rate) software development bootcamp
